The Wienerberger Sustainable Building Academy is an education program on sustainable building for students of architecture, civil and environmental engineering.

WIENERBERGER SUSTAINABLE BUILDING ACADEMY

WHAT IS WISBA?

The Wienerberger Sustainable Building Academy (WISBA) is an international education program in the field of sustainable building. WISBA is jointly developed and coordinated by Wienerberger AG, as well as the Vienna University of Economics and Business, in cooperation with other European technical universities.

TARGET GROUP

WISBA is dedicated to students of Architecture, Civil and Environmental Engineering who are outstandingly motivated in the field of sustainable building and wish to extend their knowledge and experience in this area.

THE PROGRAM

WISBA supports these target groups in Austria, Belgium, Italy, Hungary, Poland and Switzerland by financing international training that is accredited with 5 ECTS and realized with experts from universities and industry.

Goal of WISBA 2015 is to draft a conceptual design based on the concept of a low-tech building. The conceptual designs take different scenarios into account under consideration of all three sustainability dimensions.

Travel, accommodation and program costs will be covered.
